

MAREK GERSZENDORF

INTERN FRONT-END DEVELOPER

ABOUT ME

I work as a junior machine designer, but programming is my great passion. I became interested in this topic at the beginning of junior high school. I have been learning programming more seriously for a long time now, with a view to the future. This is my passion, so something special would be earning a hobby. Mainly interested in web technologies but I am ready to learn other languages. Apart from programming, I love new technologies and startups

EXPERIENCE

JUNIOR MACHINE DESIGNER / 07.2020 - NOW INFOTEC CNC

One of my main tasks is the preparation of documentation technical machinery and creating programs for sheet metal processing

DESIGN DEPARTMENT ASSISTANT / 07.2019 - 08.2019 INFOTEC CNC

Summer job where I got to know CAD software. I learned to design machine parts and gained professional experience.

MACHINE DESIGNER / AUTOMATIC / 03.2019 - 04.2019 INFOTEC CNC

An internship during which I saw what the work of automation and designer looks like. During this period, I mainly dealt with programmable PLC and Arduino controllers.

PROJECTS

POMODORO APP

An application that allows you to learn using the pomodoro technique. The timer is counting down four 25-minute learning sections with 5-minute breaks between them. There is a 15-minute break after all sections are completed.

Kod: <https://github.com/mgerszendorf/Pomodoro-app>
Live: <https://mgerszendorf.github.io/Pomodoro-app/>

TO-DO APP

An application designed to better organize your time. It allows you to set the priority tasks and counts already completed. Adds a due date for the task.

Code: <https://github.com/mgerszendorf/Todo-app>
Live: <https://mgerszendorf.github.io/Todo-app/>

SHORTLY

The site is intended to shorten links. This is a challenge prepared by frontphotosor.io. The main algorithm will be added by me after completion gaps in knowledge of Node.js

Code: <https://github.com/mgerszendorf/Shortly>
Live: <https://mgerszendorf.github.io/Shortly/>

RECOVER

Recover is one of the first pages I programmed. I created it with with the help of a graphic design prepared by a graphic designer.

Code: <https://github.com/mgerszendorf/Recover>
Live: <https://mgerszendorf.github.io/Recover/>
